K&N® Cabin Air Filters replace your vehicle's stock cabin filter with a reusable design that cleans and freshens incoming air. They are electrostatically charged to grab and hold dust particles. K&N® cabin air filters help control odors while they help capture most mold, mildew, fungus, spores, bacteria and germs. When they get dirty they can be cleaned and reused and best of all, they come with a 10-year/Million Mile Limited Warranty.

If you need any assistance please call 1-800-858-3333 to speak with a representative in our Customer Service Center before returning the product.

When applicable, refer to owner's manual for manufacturers installation/removal instructions. The following are helpful steps when replacing/servicing cabin air filter with K&N® cabin air filter.

1. Locate the cabin air filter housing on the right side (passenger side) of the engine compartment. (Fig. 1)
2. Remove existing cabin air filter by pushing down on the filter and pulling it past retaining tabs. (Fig. 2 & 3)
3. Clean any debris from the filter housing.
4. Install the K&N® cabin air filter with the K&N® logo reading down and facing the outside of the vehicle. (Fig. 4)
5. When installing the K&N® cabin air filter, be sure the base of the filter is located behind the raised bosses at the bottom of the cabin air filter housing and held in by the retaining tabs at the top. (Fig. 5 & 6)
6. Once the K&N® cabin air filter is in place, clean an area on the housing and apply the K&N® Stop Decal to notify others that this is a washable, reusable cabin air filter.
